(54) Title: FABRICATION OF DECORATIVE LAMINATES AND PANELS

(57) Abstract: The invention relates to a Matrix (1,2) for fabrication of a matrix (3) in the fabrication process of a decorative laminate (11') for a panel with a surface structure wherein the matrix (1,2) for fabrication of the matrix (3') comprises a wood member (13) with a surface structure. The invention furthermore relates to production matrix (10') for the fabrication of a decorative laminate (11') for a panel with a surface structure wherein the surface structure of the production matrix (10') is pressed into the production matrix (10'). The invention further relates to a method of fabrication of a decorative laminate (11') for a panel with a surface structure wherein a production matrix (10') of above is pressed together with the decorative laminate (11) in order to at least partially transfer the surface structure of the production matrix (10') onto the decorative laminate (11). The invention further relates to a decorative laminate, a panel and a fabrication method of a panel.
